(57) Abstract :

The present invention relates to an incentive-based attendance tracking device (10) comprising a biometric fingerprint scanner (12), a real-time reward display (11), a numeric keypad (13), and a manual override button (14). The system authenticates employee presence and instantly increments a reward counter displayed on screen. Designed for portability, offline logging, and optional server sync, the invention promotes punctuality and reduces manual HR workload through integrated behavioral feedback.
