(57) Abstract :

A portable surface energy analyzer device (100) includes a contact angle module (102), fluid micro-dispenser array (103), embedded camera (104), illumination unit (105), touchscreen control (106), battery source (107), and processor (108). The device (100) quantifies surface energy using captured droplet images and provides adhesive compatibility recommendations in real-time for field and factory use.
