(57) Abstract :
 TITLE: A TRAVEL ADVISOR SYSTEM USING A GEOSPATIAL APPROACH A method has been proposed in the present invention to provide trip planning related locations, transportation services and dining places. The method includes a geospatial approach having geographic information system that detects the geographical location of an area and a remote sensing system that monitors the physical characteristics of the location. The geospatial approach provides desired location and dining places. The method also provides the trip services and also recommends renowned, yet undiscovered weekend getaways or special day destinations tailored to your budget.
