(57) Abstract :

The present invention relates to an automatic solar water trash collector. The automatic solar water trash collector consists of the two plastic drums on which trash collection unit floats over water. The automatic solar water trash collector consist two plastic drums on which frame and trash collection unit is placed and fitted to tow drums. The rest devices like sensor, microcontroller unit, small motor, small fan, battery, small suction pump, metal wired net, alert unit, sound, multicolour light unit, direction changing arm plate, ON/OFF switch, transmitter and receiver, remote control, these are placed on the frame in such a way that balance is made on both the drums. The automatic solar water trash collector is operating on remote control via transmitter and receiver.
