(57) Abstract :

The present invention discloses a Virtual Assistant Model for Personalized Educational Guidance comprising a User Interface Module (101), Student Profiling Unit (102), Adaptive Learning Engine (103), Feedback and Assessment System (104), Predictive Analytics Module (105), and Integration Layer (106). The invention dynamically customizes learning experiences, provides instant feedback, and predicts academic challenges, thereby offering holistic, adaptive, and scalable educational support. This model improves student engagement, learning outcomes, and accessibility across diverse educational contexts.
