(57) Abstract :

The present invention discloses a cloud-enabled platform for intelligent knowledge management systems that integrates a user interface module (101), AI-powered knowledge engine (102), cloud storage unit (103), semantic indexing module (104), analytics unit (105), and security layer (106). The system enables semantic search, contextual recommendations, predictive analytics, and secure collaboration. By unifying structured and unstructured knowledge, the invention enhances information retrieval, reduces redundancy, and supports global scalability. The platform continuously learns from user interactions, providing adaptive, intelligent, and secure enterprise-wide knowledge management.
